Director Merriam Determined to Complete the Work on Time.

More Than Half the Allotted Period Has Already Expired-Clerks Secking Permanent Berths Elsewhere -Danger to Records From Fire.

Though the heat in the "hot house" buildings of the Census Bureau is at times well-nigh intolerable, and claims daily its many temporary victims, the work of the bureau grinds on at unceasing speed toward the time goal set by the act of Congress creating the bureau of the Twelfth Census. Congress has gupulated July 1, 1901, shall see the completion of the work, and Director Merriam has opened the valves, put on all pressure and, barring Providence interfering, will do as the law directs.

The clerks of the office, by a new arrangement, put into effect some little time ago, are now permitted to make an extra dollar or so by working overtime, If they are so disposed. will be completed in time. He is prepared to see that it is done, if every available man in the country is needed to help effect that end. But such drastic measures are improbable, as it appears now that with the present force, despite its daily depiction, the work will be consummated in just about a year's time, The population statistics are now prac-

tically completed, and a monograph of 500 pag s devoted to this one branch of the work has already been printed and patre; wagon and carried to the Second gust 5, will be taken up entirely by bissued. This in itself is an unprecedent of achievement. Never before in the history of census work has the publication-

that census by four years.

The law authorizing this census work contains a clause requiring that the statistics on the four main subjects be completed July, 1962, but this section was inserted in a spirit of jest. Such a thing had never been approximated, much least accomplished, and the members of Congress had no idea of seeing it lived up to. The joke is now reacting on some of them, for with the completion of the work they see a lot of their constituents about to be turned out of their constituents about to be turned out of their positions, and they are already hearing from these constituents, who know that from now on it will be a question of the survival of the will be a question of the survival of the ones with the strongest pulls.

The Director is hearing from Senators broken by the bullets, and Members of Congress, who want to know why he is rushing the work at such a furious pace and what he means by overworking his force. The Director smiles and points to the time limit in the

law which they passed.

After July 1, 1962, some little work will remain to be done. Reports on miscellaneous subjects will follow from time to time. This will keep a small force of clerks and statesticities. clerks and statisticians employed for several years, but the great work of the Census will have been accomplished by that date. This means the publication of ten volumes of statistics on the or jects of agriculture, manufacturing, po-ulation, and vital statistics. The force at the Census Office will be

reduced to about 500 by next January. The "slaughter of the innocents" will not begin until the coming November, but aleady the men and women clerks are be-inning to look for new positions. Incidentally the clerks generally man-

age to date their resignations at the end of a thirty days leave of absence, with possibly a few days to spare for illness. This adds a little to the expense which is now running at about \$,000 a day. The Is now running at about \$,000 a day. The June payroll was \$25,000. The loss which would occur by a fire in the Cersus building is a matter which is always present in the mind of Director

Merriam The results of over a year's labor in punching cards, revising schedules, counting, and tabulating-not to mention the field work which went to gathering the materials-is nearly all assembled under the roof of the Census building. In cost to the Government it represents millions of money, and it is now in such shape that a fire would sweep it all away except what has appeared in the published statistics of popu-The building is thoroughly combustible, and with its contents would burn like a

There are special chemical engines and apparatus at hand, and there is special communication with the District fire department. If fire should break out in working hours the greatest danger would be from panic.

## MORE CENSUS STATISTICS.

#### A Bulletin Covering Five States, the District, and Hawaii,

A bulletin issued yesterday by the Census Bureau gives the population by sex, nativity, and color of the States of Delaware, Fiorida, Georgia, Idaho, and Illinois, the Territory of Hawaii, and of the District of Columbia. In but two of these divisions-Georgia and the District of Columbia-is a larger proportion of females than males shown. In Hawaii the excess of males is unusually large, due to the Chinese and Japanese laborers

who have immigrated there, The bulletin shows that the foreign born element constitutes nearly threefifths of the population of Hawaii, and comprises mainly Chinese and Japanese. In Illinois foreign-born white persons constitute 20 per cent, and native whites of foreign parentage SL1 per cent, these two elements combined representing a little over one-half of the entire population of the State. These same two ciements of the white population constitute practically 40 per cent of the total population of Idaho, from 18 to 29 per cent of stranger who presented the order. that of Delaware, the District of Column

DEPARTMENTAL BASEBALL LEAGUE. Early in the spring it was suggested that because of the very great interest aroused in baseball by the location of Manning's American League team here, the time was ripe for the formation of an amateur league to play a schedule of games while the professional team was on tour. Nothing was done in the matter because of the lack of interest among the amateurs until last week when some of the former leaders in this direc-tion got together and decided the time was ripe for a league and organized. It was decided that the element of pro-fessionalism which heretofore did not tend to make local leagues of great success, should not be an ingredient in the make-up of the new organization. The

ASSOCIATION EXTRIES AT BUFFALO. It has been decided by the athletic com nittee and Physical Instructors Rideout and Beckett, o' the Young Men's Christian Association, to make entry in the handicap and championship track and field games of the National Young Men's Christian Association games to be held at Buffalo this month.

Th handicap games will be held July 23 and the championships on the following

Those who will be entered in these games are Royce Hough, high jump; W. G. Stuart, half mile and mile; R. B. Redington, 220 yards, and L. J. Mather, pole These men will go in care of Prof C. E. These men will go in cars of Frot C. E. Beckett, under whose direction they are taking regular and hard practice.

They all have good local records in their respective lires, and their work will undoubtedly reflect craffit upon the association they represent.

Outside of the work of these men there

is but little going on at Association Park, with the exception of tennis playing and the practice of the ball team. The Association Baseball League having completed its schedule, the teams have disbanded, and from among their players a regular or representative association team has been formed, with A. C. plice in a Recent Robbery. By the arrest last night of William Palmer, a negro, twenty-four years old, the police think they have cleared up a burgiary at the home of John Myers, 2338 Brightwood Avenue northwest, more than a month ago. Joseph Chissell is now in the penitentiary at Moundsville, W. Va., for complicity in the crime, but Palmer eluded the detectives until last night. He was arrested on a bench warrant from the Criminal Court, issued several days ago, because of an indict-

ment returned against him. For some time Detective Sergeant Lacy and Policeman Geier, of the Eighth precinct station, have been working to capture Palmer, whose home has ing to capture Palmer, whose home has been at 300 Pomeroy Street northwest. On an indictment being found, a watch was kept on the home of the negro, and yesterday afternoon Policeman Geier was rewarded by seeing the trunk of Palmer removed from the house. The policeman followed the wagon which contained the trunk, and in this way located Palmer in Southwest Washington. # RAIDS IN THE SOUTHWEST.

Two Houses Receive the Attention

Saturday night was very lively in Southhe conducted in a successful manner up west Washington. There were two raids to the time of his death. Mr. Lannon was and several arrests. Interest seemed to a brother of the late John Lannon, one of centre in a round-up at the house of Alexandria's enterprising citizens. The Maria Sanderson, colored, 314 Maine Avedeceased was a member of the St. Vincent, one southwest, where were found half a de Paul Society, and the Catholic Benevo- dozen women. Sergeant Dunnigan and his men took the women to the Fourth precinct station, on charges of suspicion, until a complaint made by a man named Reed, whose home is at the Hotel Slater, Second and B Streets northwest, was fully investigated.

Early in the night Reed visited the station and reported that he had been robbed of a valuable ring and about \$20 cash, while in the Sanderson house. The locality where the house is located has a bad name, and Sergeant Dunnigan led a raid, with the object of clearing out the particular house where Reed said he was robbed. Sue Mays Mabel Osborne, Made-line Coleman, Mary Collins, and Rosa Pope were found lounging about the remises and were taken into custody.

The Mays woman was sent to the First precinct station and searched, but nothing was found in her possession. A charge of keeping a disorderly house was entered finally against the Sanderson woman, who Methodist Episcopal Church will be conducted by the Rev. J. W. Duffy, of Washington.
